30 Days Notice Period | Open to Relocate

Professional Summary

Backend Engineer with 2+ years building scalable REST APIs, microservices, and AI-powered backend systems using Python, Django, Flask, and FastAPI. Hands-on with LangChain, Hugging Face, and RAG workflows for LLM-based applications, plus SQL optimization and CI/CD automation. Strong foundation in DSA, OOP, and Agile practices, with a track record of measurable performance gains in production.

Professional Experience

Cloud BC Labs (US-based)

Software Engineer

Bangalore, India

Jun 2025 – Present

- Building an AI-powered recruitment platform using Python, LangChain, Hugging Face, and RAG pipelines for resume parsing, candidate ranking, and automated interview generation.
- Own end-to-end backend development for the resume-parsing and candidate-ranking pipeline, from API design through deployment.
- Developed core Hospital Management System modules covering patient records, billing, scheduling, and reporting; design and maintain REST APIs and modular backend services supporting distributed system architecture.
- Work within a cross-functional, distributed team across development, testing, debugging, and deployment.

Test Yantra Software Solutions

Associate Software Engineer – Python

Bangalore, India

Nov 2024 – Mar 2025

- Developed scalable backend applications and REST APIs using Python, Django, and Flask for distributed systems.
- Improved API response time by 20% and reduced SQL query execution time by 30% through indexing, query tuning, and schema optimization.
- Automated build and deployment workflows using Docker, Jenkins, and Git, cutting deployment time by 40%.
- Participated in Agile sprint planning, peer code reviews, and requirement discussions.

Garuda Aerospace Pvt Ltd

Junior R&D Engineer Intern

Chennai, India

Sept 2022 – Jan 2024

- Developed IoT-enabled drone monitoring systems with real-time alerting for operational data tracking.
- Delivered technical training to 300+ trainees under RPTO standards; received a Letter of Appreciation for training quality.
- Supported testing, deployment, and compliance documentation for defense-related use cases.

Key Projects

AI Recruitment Platform: Built an AI-powered recruitment workflow using Python, LangChain, Hugging Face, REST APIs, and RAG pipelines for resume parsing, candidate ranking, and automated interview generation.

Hospital Management System: Developed backend services and REST APIs for patient management, appointments, billing, and reporting using Django and SQL.

Demand Planning System: Built backend workflows and planning modules for forecasting and resource planning, including database integration, testing, and deployment.

Anti-Poaching System: Built a sensor-driven monitoring and intrusion detection system using IoT sensors and real-time alert mechanisms; published as a research paper in IRJET.

Technical Skills

Languages: Python, JavaScript, Java, SQL

Backend: Django, Flask, FastAPI, REST APIs, Microservices

AI / GenAI: LangChain, Hugging Face, LLMs, RAG, Prompt Engineering

Databases: PostgreSQL, MySQL, SQLite, Query Optimization

DevOps: Docker, Jenkins, Git, Linux, CI/CD

Core CS: Data Structures, Algorithms, OOP, System Design

Education

Agni College of Technology

Master of Engineering – Mechatronics, Robotics & Automation

CGPA: 8.35

Chennai

2022–2024

Dr. Ambedkar Institute of Technology

Bachelor of Technology – Electronics and Communication

CGPA: 7.73

Bangalore

2018–2022

Certifications

2025: Generative AI with LangChain and Hugging Face – Udemy | Python for Everybody – Coursera

2024: Java Full Stack Development, React JS, AWS DevOps Basics – JSpiders

Achievements

Solved 150+ LeetCode problems (DSA & problem-solving) | Published research paper on the Anti-Poaching System in IRJET | Letter of Appreciation for technical training delivery at Garuda Aerospace
